

Vellus Tips and Guidelines

Terrier Maintenance Schedule

Bathe furnishings once per week with Vellus Show Shampoo diluted at 15 oz. water to 1oz. Concentrate. . . Rinse well. After toweling the furnishings, apply liberal amounts of Satin Cream as this will protect the hair from wear and breakage. The jacket of a stripped Terrier should be bathed as each individual dog needs it, using Clarifying Shampoo to retain texture.

Show Bathing: Use the Clarifying Shampoo for the show bathing as this removes any buildup and allows for maximum body and fullness. Always remember to bathe furnishings after the show to remove any chalk or other grooming preparations.

The Static Stabilizer (ready to use moisturizer) is invaluable when brushing the dry coat as it adds moisturizer which keeps the hair from breakage.

The last prep before going into the ring must be the Finish Spray over the top of the dog's head and topline...let settle and brush vigorously with a boar bristle brush to set coat and tame any unruly hairs.

Spaniels and Setters

Setter and Spaniel Maintenance:

Always Clarify Shampoo for the first bath and let it soak for 10 minutes (this is a must). Rinse well. Follow with Vellus Show Shampoo and let soak for 5 minutes. Rinse well. Apply diluted Conditioner and leave in for maximum conditioning.. .rinse for a lighter conditioning. If there are any high-wear areas, apply Satin Cream after the dog is dry and watch that hair grow!! This works well for protecting the hair from urine staining. Apply several times per week in between baths. Always remember the cleaner and more conditioned the hair, the stronger and more luxurious it is going to be.

Show Bathing:

Depending on how oily your particular dog is will determine how often you use your Clarifying Shampoo. Generally on a weekly program, you need to Clarify every 2 or 3 baths, When preparing for the show, use Clarifying and Show Shampoo without conditioning. Always remember to spray your Static Stabilizer before brushing a dry coat.
